Hi Paul,

I am one of your neighbors. I am not sure I will be able to make the meeting. Here are my concerns although I am sure you are well aware of them.

I think it unfair that CN does not believe it is their responsibility to pay for changes needed at grade level crossings given the amount of traffic that they will effect. Besides slowing school busses and emergency traffic, it will also increase air pollution as traffic idles until the train clears the intersection.

I am also concerned about the additional noise. We in Stonebridge are all too aware of the noise from the nearby switching yard, more train noise is just not acceptable.

Hope this helps.
Teri Conrath
