

STB Finance Docket # 35087

8-20-08

Dear Ms Johnson-Ball,

My concern with the sale of
ET+2 to CN is a quality of life issue.
I live about 110 yards from the tracks
between McCoy and Ogden (Rt. 34) in Aurora.
Most of the trains that currently pass by
are tolerable. Some are intolerable, in that,
they jar the pictures on the wall, make
talking on the phone or listening to TV
impossible.

My point is that a study should
be made to determine the maximum amount
of noise a train can make in some units
such as decibels. A provision should be
put into the sale that trains should not
exceed this "noise" level. I am not
talking about the whistles which are
necessary for safety.

Thank you for your consideration -

Mr David L. Booth
