Transcript:

I am contacting you because we are completely against the purchase of this CN Railroad. We do not want this coming through our community. It is a hazard if there are any spills and we simply do not want the noise or the potential danger to our wells system that could happen. We are on wells out here. We drink this water--bathe in this water. We do not want that affected by spills that can happened when you have a large number of trains coming through. We are completely against the purchase of this. We do not want this going through for any reason. Thank you.
