Transcript:

I live on the south side of the proposed railroad tracks that will be affected by the CN Railroad acquisition and this will severely cripple, especially this side of town, but I also fear economically, which is very close to heart right now, what it may do to the values of the properties on this side of town. Emotionally, I'm very distraught about the threat of anything that may be hindered in the way of emergency vehicles, but in the recent events within the past week or two with the credit crunches and the bank scares and just the scare in the general economy, I can not afford for our property values to be even further disgraced by such an action. The amount of train passes that would be made is totally unacceptable and I fear violent repercussions can occur with this, which I certainly don't want to see in such a nice area. So I strongly oppose and express my opposition with this phone call and hope that it can be passed along and seriously considered. I will respect any outcome that evolves from the final decisions, but nevertheless, as it is currently and we will have to move in time if it does fall through. Thank you
