Transcript:

I live in King County. I do travel on a road which crosses the Canadian Rail line on my way to and from work. I have on numerous occasions been stopped for long periods of time by long trains traveling on the track as such I have been late to work because of these trains. They come unexpectedly and we have no warning that they are coming through. I am also concerned regarding what these additional trains that are going to be re-routed this area will have will carry on them is it going to be something that will if in case of an accident or a spill harm the environment or people that live within this area and work within this area? I do not feel that the Canadian Lines should put more train traffic through on this line. I think its very inefficent and will make traffic and traveling much more diffucult for everyone involved. Thank you very much.
