Hi Diana,

That it definitely something that we will be looking for when we eventually review the landscaping/vegetative screening plans, to ensure that whatever is done is as compatible with the surroundings as we can get. In concept though, I don't believe that any reasonable landscaping would jeopardize the NR-eligibility of the district, but of course we'll need to see their proposal to confirm that. I think it would take something on the order of major incompatible development or the opening of a quarry within the district, or a large amount of demolition of contributing structures before we would find that the district is no longer NR-eligible.

Let me know if you have any questions or need anything else. Thanks!

Subject: RE: MCEAA Questions

SGR will be responding to three of the questions. Can you confirm if the NRHP status would remain intact (see question 7) under the current Resolution Plan?

I'm forwarding MCEAA's letter and my comments again.

Thanks

Diana

Also, please respond to question 10.

Thanks

Subject: MCEAA Questions

David:

I received the attached questions from the Fitzgeralds late Friday and will need to respond. There are two questions – one regarding 41 ME 261 and the other regarding the 404 permit and whether tribes were contacted – that I need SGRs input on. Could you look at these questions and respond accordingly?

Thanks so much.

Diana
