Message:

Thank you so much for not being pushed by Canadian National to make a decision before all the I's have been dotted. It is interesting to me after being gone for about a month, that the trains that pass by our house are now blowing their whistles quieter and going thru the crossings slower. When you are doing all of your studies please keep in mind that it has not always been like this. They have changed perhaps knowing that all the studies are now going on. Thank you for your continued reserach into what is best for everyone. The tracks were not made to handle all the trains that are expected to go thru our town of Frankfort. We moved here knowing that 6-8 trains pass by not 40 as predicted. Canadian National is just taking all the traffic from one place and putting it in another. Why don't they lay new tracks out in the country where things can develop around the known train traffic. Thank you again for all that you can do to stop this sale.
