Transcript:

My comment is that I think if the CNN wants to buy this railroad they had better put in underpasses and overpasses on every railroad crossing because we are south of the town, that's off of the tracks, and it's going to be very, very difficult to have ambulances and fire department to get to us and get us to a hospital and being retired citizens I think that's very important for us and you don't want to be sitting and waiting forever and ever to be able to get across the tracks to go anyplace. We don't want to have to make detours ten hundred miles out of the way just to get across these tracks in between the numerous trains that are being proposed. It is just, with the gas milage and everything the way it is, you just don't want to do that. I really think this should be looked at again and again and again and again and why are we giving Canada all this stuff without making them pay for making the transportation across the tracks better for us?
