

EI - 19069

We, Kyle and Gail Shaw, are the lessees of the Ted Hirsch property that contains a Fish, Wildlife and Parks conservation easement. Our property also has a grazing system implemented by the FWP that has been in place for some time and working well.

Here is a list of some of our concerns:

1. We would need two public crossings to accommodate the hunters to fulfill our contract with FWP.
2. Satisfactory crossings for livestock, machinery and wildlife.
3. Fire danger for our pasture lands.
4. Access during construction for hunters, livestock and wildlife.
5. Pasture fragmentation.
6. Stock water access.
7. Construction access due to river crossings.
