### Transcript:

I'm calling in regards to the building of the railroad track to Canadian National. In regards to that, I feel that it is a bad thing for the community. It's gonna congest the streets with the long railroads, it's gonna congest the highways and everything else with the trucking coming in to the railroad systems. These were not intended for mass transit to be coming through there and dumping off whatever for exports and imports. That hub should be done somewhere out in the Chicagoland area and not in the suburbs of that area so I am definitely opposed to that and also in regards to the closing of the national parks, we need more national parks we don't need to have them closed date also. Thank you.
