Transcript:

I hope all who are involved completely deny this thing that is going to happen with the trains. We live near the railroad tracks, and the trains, as they run now even, tie up traffic unbelievably. God forbid that anyone on this side of the tracks needed emergency care, to save their lives or a house burning or whatever, because, there is a gridlock and no emergency services would be able to get through. I just cannot believe that you would allow this to happen and impact these towns and all these peoples lives. Not only the economics of the towns, people will stay out of it because it is not worth it to get into a traffic jam, but for safety issues. I am asking you to please turn this down. Thank you.
