Surface Transportation Board -

I am concerned about many issues with the CN railroad coming through our communities.

First of all, traffic congestion in Lake Zurich and Bellingham would increase incredibly! Transportation through the "burbs" is already an issue... add more long trains to the picture and that would be a mess. With the price of gas today and then adding traffic, I just don't feel the addition of trains is a responsible action.

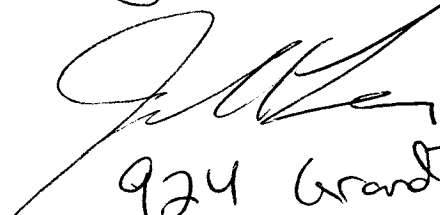

Also, I feel that more trains would be a tragic safety issue. There are a lot of walkers and bikers that travel through the areas that the trains would be going.

Please consider the impact
that would have and the
liability that would be taken
on.

I feel the "cons" far
outweigh the "pros" of having
CN come through our communities.
Thank you for listening.

Sincerely,

Jane Fidler
