Transcript:

I'd like you to get rid of the freight trains that go down to La Grange including the railroad tracks, because they are very bad. And also the freight trains that go down to Brookfield, I mean there is no way anybody can go down to Wyola hospital because ambulance can't go down that way and by the time you go down that way that person could be DOA. You just have to get rid of those freight trains on Surmac road near the Army base at Wyola hospital in Maywood. And also in Brookfield, we ruin our tires when we cross those tracks over there on 22nd street. So, I would like you to do something like that, and I would appreciate it, because it's dangerous and all that and people and ambulance can not get through. Thank you very much and have a great day.
