Hi Josh,

I assumed that the maps you had before were Google Earth because they looked like the Google Earth maps I had seen in the past. Were some of those actually Bing maps? It seemed like they downloaded fine. I was talking with my son and he said with our slow internet speed that he thought it would take us several days to download Google Earth. For the folks that have Google Earth I am sure the new maps will be great. I used the other interactive maps and when you zoom in you can see pretty well where the route is. It doesn't show the detail of the Google Earth type though.

Hi Mark,

To open the .kmz files, you will need to download GoogleEarth. It is free to download at <https://www.google.com/earth/>. Let me know if you are still having problems.

Hi Josh,

I see that you put them up now. I tried to get them to work and it wanted me to download a program. I got the program almost downloaded and

then it
said it didn't do it right. The program is Free Editor. If I can
get that
downloaded will I be able to open the files?

Mark

Mr. Fix,

I just wanted to let you know that the .kmz (GoogleEarth) files of
the
alternative alignments have been posted on the Tongue River Railroad
project website at <http://www.tonguerivereis.com/map.html>. These are
the
same routes that are shown in the interactive map. I hope they are
helpful!

Hi Josh,

I understand that the latest up to date maps are on the interactive
site.

One of the people in the Ashland area asked why a specific person
who had a

house crossed by the alignment was not shown in the photos of the
residences

crossed. I thought that we could look at the maps and see that. Unfortunately the interactive maps are not enough detail to see that. The google earth maps were. I don't know if you can update the Google Earth maps with the latest alignment, but that would probably be the best for folks to see where the routes are going now.

Mr. Fix,

My name is Josh Wayland; I am with the Surface Transportation Board's Office of Environmental Analysis. Vicki Rutson asked that I reach out to you to make sure that you were able to access the maps of the alternatives for the Tongue River Railroad project. The final maps from the Draft EIS have been published as an interactive web map that you can find on the project website at <http://www.tonguerivereis.com/map.html> . Please feel free to call me at the number below if you are having any trouble using these maps or if you would like me to send you the maps in a different format. Just let me know what I can do to help!

Best regards,

Josh Wayland
