I live in the Barrington area and am totally against the CN's acquisition to purchase the EJ&E rail road and increase the amounts of trains that would use the tracks from about 5 to up to 26 trains per day. I am also very opposed to this foreign corporation who annually profits \$2 billion is asking the taxpayers to front the bill for the building of the grade separation infrastrucure. I am very concerned that the increased freight trains would have a economic, environmental and quality of life impact on this community. Also they are carrying hazardous wastes right through our backyards and schools. The CN railroads have had several accidents with fatalities and evacuation of a three mile radius due to the overtiredness of their conductors and also to the tracks being not taken care of properly. Please don't put money over peoples welfare and safety of their homes and children. Please don't allow this company to put money before people . Please fight against this acquisition and help this community of Barrington no be devastated by this huge company who does not care of the safety and concerns of our community.

Please oppose this acquisition!
