

Re: Finance Dept #34 284
Vulcan materials Co./Southwest Gulf Railroad

#E1-2755
R91

Date: 1-13-07

Dear Sirs,

I moved to this area in 1978 to raise my family. I believe this is the wrong place for this project. They should go to a less populated area and less harmful impacts.

I do not want the historical and archeological sites harmed.

I don't want flooding that would be caused by this railroad. If so they should have overpasses over the main roads. Also fuel storage and maintenance areas should be moved out of the slum creek floodplain.

The idea that this railroad will be a common carrier - it will not happen.

Basically they should see this place - where they are going to put it - when it floods - any one with sense would not do anything commercial there - it floods.

We don't want this Vulcan gravel pit in our area or railroad.

Respectfully,

Robert Reed DD
