Comments to Surface Transportation Board Office of Environmental Analysis
re AB-167_1189_X and related cases , Harsimus Branch National Historic Preservation Act Section 106 Review

We residents of the Hamilton Park neighborhood, while reserving the right to comment further, including on the validity of this process, believe that if the Harsimus Branch is not protected by your agency through remedies in federal law, extreme adverse effects will result to our Historic District. Such "reasonably foreseen" effects include but are not limited to demolition of the massive historic Embankment and construction of untold numbers of residential and commercial units between two National Historic Districts, with attendant noise, pollution, vibrations, loss of views, and aesthetic disruption to the Districts and to our residences. Foremost, the irreplaceable National-Register-eligible Embankment and transportation corridor needed for public use will be lost forever.
