Transcript:

I'm calling in regards to the STB Finance Docket 35087. I'm against this because of the fact that emergency vehicles will not be able to reach our neighborhood. I'm also concerned about the toxic waste that may be going across on these railroad tracks. And, of course, the back-up. We have no other way to go north and south through New Lenox except if you cross these tracks. These train tracks are going to be a great hinderance to everybody in this community. Thank you.
