

7-15-2016

Dear Sir:

In regards to the GLBT Railroads that this is a land grab by Private Investors!

the primary railroads that serve this area have not called that they need help to service this area or route thru the area.

The farm ground is the "Bread Basket" of the U.S. With fifteen thousand acres or more destroyed by this private railroad! WHY?

It will put a change to field configuration with all of the curves in this route, putting farmers with not only lost acreage to the right-of-way, but lost acreage to areas that cannot be farmed!

This will disrupt the lives of many people. The waits at railcrossings are short compared to the waits at this new railroad with all the curves.

In closing we are against the GLBT Railroad

Thank You

Alice J. Zink
