Transcript:

This is in regard to STB Finance Docket No. 35087. I tried to put these comments on line, but in the dropdown menu, I don't see a place for me to put this with the STB in the dropdown, so I am leaving the comments here. I have 2 sons in school. One of them, their bus crosses the railroad. There is no way to get to the school without going through the railway crossing and I am very concerned about the safety. There is one lane at that crossing. Also, the bus route, there is about 3 different ways to go from the school, and two of those crosses the railroad, and in some cases crosses them more than once. Whenever I go to church, I will be crossing the railroad twice. There is some wildlife here in this area and it could have a very negative impact on the environment and on nature and really ruin the quality of life for us people who are here in Frankfort. Hopefully these comments will be taken into consideration and the government will do the right thing. Thanks. Goodbye.
