RE: ROCK AGAINST THE RAIL

Dear Mr. Nevecky:

We are against the proposed Great Lakes Basin Transportation, Inc. railway through the Township of Bradford and Village of Emerald Grove Wisconsin.

The railway will run approximately one-fourth mile from our property. We have lived in this area for our seventy-five years and do not want the environment and land polluted. We will feel the earth move and hear the noise of the trains twenty-four hours a day. It certainly effect the value of our property.

In addition, the railway will be right next to our Cemetery which is a very quiet place for families to have time by their family graves. The railroad would certainly destroy the peace and quiet there.

The railway will also run right next to the Emerald Grove Church. We have many stained glass windows that will certainly be destroyed by trains moving at a high speed. Our Sunday services, funerals, and weddings will be interrupted by high speed moving trains.

Sincerely,

Charles T. Stevenson
