I am opposed to approval of the sale to Canadian National. Traffic through downtown Barrington is horrible now. Increasing traffic on the EJ& E line will result in each train stopping traffic on all three major roads which go through downtown Barrington. It will create an impossible situation for the school buses serving the high school and two middle schools (both of which are on the same side of the tracks. Yes, rail traffic will decrease on other rail lines in the Chicago area, but these lines have very few grade crossings and over 100 years the local communities have well adapted to them. Mediation would cost hundreds of millions of dollars which no governmental body has available.
