

# Say No to the Tongue River Railroad

Dear Victoria Rutson, Surface Transportation Board, Attention: Docket number 30186

The proposed Tongue River Railroad in southeast Montana would give the power of federal eminent domain to a for-profit corporation to gamble on coal exports. If built, the railroad would condemn and industrialize dozens of miles of family ranchland. It would cut cattle off from water, spread weeds, destroy Native American cultural sites, start fires, and more. It would permanently damage a vibrant and long-standing regional culture and economy just to ship coal to Asia. The railroad would also dramatically increase coal train traffic in dozens of communities. This traffic would slash property values and increase traffic congestion, safety hazards, and air pollution. The coal export market is speculative at best, and we shouldn't condemn family farms and ranches on speculation. Say no to the Tongue River Railroad (choose the "no-action" alternative).

# Say No to the Tongue River Railroad

Dear Victoria Rutson, Surface Transportation Board, Attention: Docket number 30186

The proposed Tongue River Railroad in southeast Montana would give the power of federal eminent domain to a for-profit corporation to gamble on coal exports. If built, the railroad would condemn and industrialize dozens of miles of family ranchland. It would cut cattle off from water, spread weeds, destroy Native American cultural sites, start fires, and more. It would permanently damage a vibrant and long-standing regional culture and economy just to ship coal to Asia. The railroad would also dramatically increase coal train traffic in dozens of communities. This traffic would slash property values and increase traffic congestion, safety hazards, and air pollution. The coal export market is speculative at best, and we shouldn't condemn family farms and ranches on speculation. Say no to the Tongue River Railroad (choose the "no-action" alternative).

The proposed Tongue River Railroad in southeast Montana would give the power of federal eminent domain to a for-profit corporation to gamble on coal exports. If built, the railroad would condemn and industrialize dozens of miles of family ranchland. It would cut cattle off from water, spread weeds, destroy Native American cultural sites, start fires, and more. It would permanently damage a vibrant and long-standing regional culture and economy just to ship coal to Asia. The railroad would also dramatically increase coal train traffic in dozens of communities. This traffic would slash property values and increase traffic congestion, safety hazards, and air pollution. The coal export market is speculative at best, and we shouldn't condemn family farms and ranches on speculation. Say no to the Tongue River Railroad (choose the "no-action" alternative).

# Say No to the Tongue River Railroad

Dear Victoria Rutson, Surface Transportation Board, Attention: Docket number 30186

The proposed Tongue River Railroad in southeast Montana would give the power of federal eminent domain to a for-profit corporation to gamble on coal exports. If built, the railroad would condemn and industrialize dozens of miles of family ranchland. It would cut cattle off from water, spread weeds, destroy Native American cultural sites, start fires, and more. It would permanently damage a vibrant and long-standing regional culture and economy just to ship coal to Asia. The railroad would also dramatically increase coal train traffic in dozens of communities. This traffic would slash property values and increase traffic congestion, safety hazards, and air pollution. The coal export market is speculative at best, and we shouldn't condemn family farms and ranches on speculation. Say no to the Tongue River Railroad (choose the "no-action" alternative).
