Dear Ms. Rutson,

I'm writing to request an extension of the public comment period for the Tongue River Railroad EIS. I'm really impressed with all the work that went into the document and I appreciate all of the public outreach that the STB is planning with its public meetings. Thank you for that.

I've been trying to read the document in my spare time and am realizing that it might be hard to understand everything and write good comments by June 23. I got hired into a new job in April and still learning/completing the tasks, my job position was vacant for several months and had a ton of stuff on my mind - when I got off work. I would remember to read the EIS - while at my job and would forget coming back home. Thus, really doing double time and not having enough energy when I get home for anything else.

Again, thank you for such a thorough job writing the EIS. I hope I can do as thorough of a job giving feedback. If I have just a little more time, I'm sure I can give more helpful comments.

Sincerely,

Bertha Brown
