Dear Mr. Navecky:

As an owner and operator of a local hotel for the past 43 years I have a vested interest in the success of Port Canaveral. They have done amazing things for the Tourism Industry and for their Taxing District. They have however been very intensely interested in only two potential routes for the Rail access that they most surely need. Some of us in the community have been urging that they consider the less intrusive third route thru the Cape Canaveral Air Force Base and it appears from the article below that we finally have their attention. Please consider the implications of this article and the new direction that this will mean if it is able to be accomplished. Please do not exclude this third option until this private/public partnership has been giving a fair opportunity to fail or succeed on its merits when considered by the United States Air Force and the Department of Defense!

Sincerely,

David W. Spain CHA
