### Transcript:

I would like to make a comment about STB Finance Docket No. 35087, the potential acquisition of the EJ&E railway by Canadian National. My major concern about this acquisition is the constant information and the reputation the Canadian National has for poor processes, failure to adhere to safety rules and regulations, for being one of the worst Canadian Railways in terms of safety for the past year. I am further concerned that the citizens do not have any recourse in terms of any control, numbers of freight, numbers of trains going by, time, sounds, horns blaring; we seem to be at the mercy of whatever the railways decide to do. That is a real issue and a concern of mine. So I just wanted you to know that I am opposed to that acquisition. Thank you.
