

STB Finance Docket No. 35087

Date: 8/27/08

The sale of Ego to Canadian National would be disastrous. It would be a major safety threat to our community. This is a community of walkers & bikers, mostly children. This track runs through the heart of town. Children walking and biking to school & friends homes would be crossing these tracks. It holds potential for disaster. It would add a gridlock traffic situation which not only would be inconvenient, but would add potential for more traffic and pedestrian accidents. The noise level would distract from the atmosphere of the village. We had temporary housing on 14 - well off of the road - when our house was being built. At 2:00 A.M. our bed shook & the noise was deafening. Fortunately, only one train went through a night. I can't imagine this being increased. This would be a big business trampling on people & government ignoring the people's wish.

YOUR INPUT IS IMPORTANT!
