

Docket No. FD35952

Attention Dave Navecky and Surface Transportation Board,

I am a concerned landowner. We farm the land and raise animals for sale. We are the Parents of four Adult Daughters all with College Degrees and Grandparents of six children. The Surface Transportation needs to halt this approval process immediately. Great Lakes Basin Transportation has not put forth a consistent and rationale proposal. There cannot be an environmental study until there is a legitimate plan that more precisely identifies Great Lakes Basin Transportation's route. Details matter. How are we able to present specific objections when GLBT does not have a consistent plan. No rail line official has presented a study about why another railroad is necessary. Frank Patton tells us to plan for future. As Farmers, Parents + Grandparents planning is in our everyday lives. When he uses the word plan he doesn't follow through. He does not have a consistent plan. The Surface Transportation Board needs to halt this process immediately.
