I am writing to oppose the CN railroad acquisition of the EJ&E railroad. I think it is very harmful when foreign corporations come in the our communities just to make huge profits but damage the communities where they will send way too many freight trains though. They want the American taxpayers to pay for the building infrastructure costs and I am totally against that.

I have lived in the Hoffman Estates area for ten years now and have many friends that live in Barrington.. I can see all the congestion from traffic on Lake Cook Rd. when my school gets let out from now only the high school but also the other two middle schools in our district. If you allow the CN railroad to increase its trains. It will be crazy there and I am sure there could be accidents involved. Please do what you can to allow them not to increase there amount of trains in our area. With all the after school activities that kids do in our area the traffic is bad enough without increasing the train cars just to make even more traffic and safety issues too. Please fight for us in the Barrington area.

Thank you for your support
