Regarding: Docket No. FD35952

Good Evening,

I purposely waited until the last minute of the last day because quite frankly I do not have much faith in any officials elected or otherwise to look out for my community. The last time I spoke against a system I was placed on a public list which I believe resulted in lost opportunities.

Forgive me if my correspondence reeks of missing statistics about the impact of train lines... or if at any point there seems to be an interpreted ignorance of the facts surrounding a private for-profit company claiming eminent domain at the expense of hard working citizens of The United States of America.

I am going to make the leap that you or anyone who cares to hear about this issue and the truths behind it will have already soaked up the gist of it at this point. I don't care to waste anymore time for anyone.

At its core, this is an issue in Chicago Illinois. NOT MILTON, WISCONSIN. Not anywhere else. Chicago Illinois has this problem...Chicago Illinois should solve this problem... Not rape the lands of countless people as their sinking boat takes water.

This should have never, ever, been an issue that Wisconsin be required to solve.

It is despicable to imagine a reality where this will ever take place. The GLB Project is unsupported. The GLB railroad is not welcome.

I humbly ask that the government of The United States of America tell the GLB Project to shove their "trains" up their ass, and stay out of Wisconsin.

Best Regards,

John Siverly
