Transcript:

I would like to say that I am concerned about the CN acquisition of the EJ&E Railroad for more than one reason. First I am concerned about the impact it would have on the police and the fire department and the response times for emergency services. I am concerned about the traffic congestion it would create. I am concerned about the hazardous material being transported on the trains. I am also concerned about the potential costs to the communities to alleviate the impacts of longer and more frequent train traffic. It would cause problems for the buses getting the children to and from school on time, and also for many people getting to and from work would have time-related problems. I feel it would cause more accidents because people would be in more of a hurry for time lost waiting for trains and would not be as cautious while driving. As you can see, I have many concerns about the CN acquisition of the EJ&E Railroad. Thank you. Bye.
