708-460-2424. We are extremely concerned about this situation with the railroad crossings as we have children living in New Lenox, Mokena, Frankfort and we are concerned about the safety of our grandchildren with emergency vehicles getting to their aid in their schools. We are very concerned about our children being able to get to work without wasting gas at railroad crossings. We think that it's deplorable that this Canadian railway can come in to the State of Illinois without adding overpasses or underpasses for the cars to go through. We are in a crisis with gas in this state and this country, and this, if it's allowed to go through, is going to waste our resources. Thank you
