

September 25, 2008

To The Surface Transportation Board,

Please, do not allow Canadian National to take over our rail system.

There are too many foreign entities purchasing our American Companies, endangering our childrens lives as they make their way to and from school on foot or by school bus.

The increased traffic temps, noise, danger of car/train accidents with no way for medical personnel to reach the crash site are an enormous concern.

Please, do all in your power to stop this from happening.

Thank you for allowing me to voice my objection to this horrible plan.
