Draft Environmental Impact Statement for the
Proposed Canadian National Railway Company
Acquisition of the Elgin, Joliet and Eastern Railway
Company

STB Finance Docket No. 35087

Date: September 29, 2008

Comments must be submitted by September 30, 2008.

We all know that trains are important in this country and abroad. What seems to be the problem is that the conductor leans on the horn for a very long time and this is completely unnecessary. Another frustrating occurrence is that the freight trains seem to run by our homes between the hours of 8:00 A.M. to 9:00 A.M. and 4:30 P.M. and 6:00 P.M., which is the busiest time of day for car traffic, either going to work in the morning or coming home from work, which are prime times. On several occasions the freight trains run very slow, causing them to stop and the local traffic cannot proceed on the busy streets, thus causing a backup of cars and trucks.

These issues should be given serious consideration; something needs to be done regarding these matters, especially the long, loud use of their horn signals.

YOUR INPUT IS IMPORTANT!
