

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

The amount of time it will take to do our daily errands and carpools will be dramatically negatively impacted. Our entire quality of life will change. We already avoid the downtown routes to avoid the congestion caused by trains. As importantly, the response times for emergency vehicles would be very much delayed. It's also the amount of time it takes when extra long trains block up to 5 crossings a the whole thing is a really bad IDEA for Barrington. I don't understand how the studies that have been done are accurate or complete. This acquisition & planned re-routing would cripple our town.

Just Say No to CN!!
