Message: I support CN's rail expansion. As well as providing efficient distribution of goods with the least impact on our environment, the railroad right of ways are also a source of tax revenue for our local communities. Tax revenues in every city is down, and they need all they can get.
Regarding the temporary inconvenience of waiting at a railroad crossing, consider the alternative to having that many more trucks on the road, which would also greatly increase local pollution.
I applaud CN's expansion into Illinois' rail network.
