To S.T.B.C.U. 1925K

You people have no idea of what goes on in farm & ranch country because none of you live out here. My Dad worked for the R.R. back in the 30's & 40's and I worked for the Texas Highway department engineers & other contractors on a lot of things and what I have read in all the papers someone needs to find a lot of common sense to look into this mess. Because there is a 100 year old dam and roads to look at. There are ranches and farm who depend on wild life for extra money and who don't want the rail or vulcan messing up the country. There are school Busses on the roads and trains and trucks don't care what they run over.
