Mokena, IL 60954

July 4/4/2016

To Mr Dave Navecky
I ~~genuine~~^{Gallinaro} enclose
this very important
letter to your attention
I did talk to a person
by phone & informed
me to include

DOCKET #
FD 35952

A very dark cloud hangs over us here in Illinois, Wisconsin and Indiana.

You would no more allow someone to enter your homes and properties by those who have nothing but destruction on their minds and self gain of your valuables.

My husband and I joined many concerned citizens at the POWER meeting June 7, 2016. We came away very upset by the comments and concerns those folks had and have.

Many dangers to the public environment, soil, wildlife, water, agriculture, vibrations & noise to just mention a few.

What greed runs through the minds of these people to try such an evil plan in the disguise of "good for all?"

I include a letter that I wrote Aug. 6, 2014 as to my concerns then and they have now a more urgent cry to be heard.

Wake up everyone! If you love this land of Illinois and else.

Generations can look back in pride or in disgust as to its outcome.

Do not turn your back on this vital issue called the Great Lakes Basin Railroad.

Our future depends on its protection for our good and those of our children's children. I want to be able to stand before my God and Creator and before forgiveness if we don't try to prevent this catastrophe!

Sincerely

Adrienne Gallinaro

*The following is reprinted from
August 6, 2014*

We are all caretakers.

Yes?

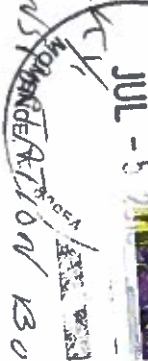

How much do we think about the air we breathe, the water we drink or food we eat? We are a spoiled people and waste much. If we are stewards of the land we also must protect it.

This is very urgent, you and I do not own the sky or water. Keeping this clean is so important, the words of Chief Seattle, 1850's cry out in its defense. Our children and generations to come will never enjoy these wonders if contaminated by chemicals and waste. Landfills that can be much recycled and incinerated, leaching into our rivers and killing human kind, so love the land as we received it from our Creator. We will be a better people for so doing.

I cannot express the joy I experienced these past few days as I was for the first time in 72 years in a canoe with my grandson rowing down the Kankakee River. to be in the center and view the nature was such a different view. I respected before, but will do the part in keeping it here for generations to come. Catch the love of
