Transcript:

I am calling to let you know that the Canadian National proposed acquisition of the EJ&E is a horrible, horrible thing for this area. I was born and raised in Barrington and have been a realtor here for 12 plus years and Barrington has gone through changes but this change would really, really be so incredibly destructive for not only just Barrington, but the whole area around here. It will just make a huge problem for so many people and not just because of the trains going through, but safety and home values and businesses will go out of business, etc. So please, please, please do what you can to let people know or the powers that be that this is a very very very bad thing for our area.
