Transcript:

I'm calling you as a concerned citizens. I cannot believe this is happening to our neighborhood. Think of Americans for once! Put us first! Put our safety and our children's safety first! By putting this railroad through, you are putting Americans at danger! Currently all of our homes on well and septic, the hazardous waste would increase three hundred fold. These studies are inaccurate. Please do not make us as American citizens look like fools, like we don't know what's going on. This is a travesty that you're allowing this to go through. Please we are begging you, do not let the Canadian Railroad reroute through our neighborhood. It would be putting us all at danger, our children, our fire department, our ambulance, our water supply, the environment. Think about us! A three year study is not acceptable. A 20-year study would be more acceptable and they're not willing to do it because they're not being truthful to how this is really going to impact us. Please consider this. Please, please, I'm begging you to put an end to the sale of this railroad. Thank you.
