Additional track maintenance is required behind the Pinecrest Subdivision near the City of Joliet. The location is east of I-55, west of Gaylord Road, north of Division Street and Route 30, behind Caroline Drive. CN maintenance crews recently replaced a section of track in this area due to noise complaints, however when double deck or heavy rail cars cross this section of track, it still creates a very loud banging and screeching noise. Residents in the area can actually see the train cars and tracks move up and down when crossing this area.
