Jan. 6-05

I was born and raised in the Quiki and Hondo Area and am very interested in the outcome of the decision that the SGB makes.

I can understand why the people that have their property divided are upset and I believe they should be compensated generously.

As far as the railroad is concerned I think Vulcan is making every effort to take the route that affects everyone the least. Also I would much rather have the railroad than the trucks on our roads. I think the jobs would be a benefit to the Area. I hope your decision will be for the railroad.
