

I am very opposed of the CN railroads acquisition of the EJ&E. I do not feel that the American taxpayers should have to pay the bills for the building of infrastructures for this foreign company that already makes billions of dollars in profit . They would be ruining several communities with their plans to increase the amount of freight trains traveling on the rails. There has to be someone responsible for considering the impact they would make with safety , pollution and environmental issues for these communities.I feel that you have to put the needs of people before freight! Please fight in opposition of this matter. You have our support in fighting the CN.

In opposition of the CN
