

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

As an area resident, I am at odds with the proposal of increasing freight traffic by 24 trains per day. I live on the north side of the metro tracks and would be impacted on my commute to & from the station by freight disruption of auto traffic. My son goes to middle school at station school; he would be delayed as well.

I would be inclined to shop in an other town rather than wait for traffic in Barrington. The proposed train increase would confine people in my town to the north of the tracks.

Why are the taxpayers responsible for the building of the overpasses? If the CN cannot afford the construction, they shouldn't be allowed to go through with the project. I shouldn't have to shoulder their debt as they reduce my property values and decimate our quality of life.
