Transcript:

I realize safety and quality of life in Illinois is unimportant to you in Washington DC, but it is to us. This sale will have a negative affect on many towns and thousands of people. I personally will suffer noise, pollution, safety factors, and serious financial loss if this sale goes through. My home is 100 feet from the tracks. They are talking about adding another track, increasing the trains from 6 a day to a minimum of 28 a day. This is outrageous. We are seniors who enjoy sitting in our backyard, enjoying the outdoors; we can't do that with 200 ft. long trains every 50 minutes night and day. They will be interrupting sleep, tying up crossings, moving more hazardous waste. This whole plan is a disaster. You must not approve this sale. Thank you very much.
