Transcript:

Hello, I'm a resident of Lake Zurich, IL 60747. I just want to comment about what you guys want to do here. I think that it's a safety hazard for Lake Zurich and Barrington and surrounding areas. With the train, it could literally cut the town in half making it so transportation between accidents and hospitals are not going to be possible. I also think that running freight trains near schools with chemical spills possible also is a very bad situation. So I think passing this would be very bad for the residents of this community and the surrounding communities and I think it would be pretty selfish of you people to say this would be okay to do. There is a lot of things to consider not only money, money is not the very good thing to be thinking about here and we don't really need this extra congestion in this area. I go over these tracks at least three times to get to work and a lot of times I get caught by the same freight train probably two times in the same morning. I can imagine how bad it would be if you do this and among the line instead of being in trouble also. So I hope you don't pass this in consideration for all the people that live around here and I hope you turn this town and don't let these people get away with wrecking this whole area. Bye.
