Transcript:

Regarding the STB Finance Docket No. 35087, and I am opposed to this because all of our roads in the area would be much more congested. There's many, many safety problems that would arise with having this happen, this purchase by the Canadian National Railway. Also, regarding any of the emergency vehicles that would need to go through the area when these trains would be passing through, these lengthy trains, there would be many, many problems. There's many other things too that I read that I would be much against this. Thank you for letting me voice my opinion.
