I would like to complete an in-depth geological survey of the land that is proposed to be impacted.

The survey would include various surface + sub-surface surveys utilizing

The area impacted will become Bountiful sites. The entire railroad will become one.

I have my B.S. degree in Environmental Engineering received @ the South Dakota School of Mines + Technology.

I would like a copy of The Environment Review.

This area will directly impact an old campsite known by the Stoe band of Cheyenne, whom

last camped @ OTTER CREEK of the Lakota Sioux.

This is 1868 Treaty land. The Ogala Lakota Sioux must also be included.
