(Please be as specific as possible)

What potential environmental issues and impacts are you concerned about?

I support the rail specifically because it could benefit the community by bringing in more industry or jobs.

I think it would minimize a lot of traffic on our roads which would be nice also.

I think the route alignment is also good because it won't impact existing industry such as farming, ect.

Again I support the rail full heartedly and feel you would really be missing the boat by not supporting this.
