

CN | EJ&E

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/25/09

I Strongly believe the impact on the Mundelein area would be greatly affected in a negative manner. the least for CN to do ~~the~~ alleviate the Congestion that their increase ~~would~~ cause is to build under/over passes around Chicago. my main concern is Rt. 60/83 The wait or traffic backs up for at least 3/4 mile now during Rush Hour. The report states 1000 ft. This is only at not Rush Hour times. please research 60/83 Crossing & Diamond Lake Rd Crossings again; especially at Rush Hours and Break down the times Seperate from the other crossing times. Itemize the time of Day along with the traffic back up for every hour.
